PAVAN KUMAR MC

Software Developer

📞+91-7892539240 ✉pavankuamrm284@gmail.com 📍Karnataka, India

OBJECTIVE

I'm passionate about web development. Proficient in **HTML, CSS, JavaScript, wordpress and Sql** and I excel at translating design concepts into pixel-perfect, mobile-responsive interfaces. I'm known for my clean, maintainable code and thrive in collaborative environments, bridging the gap between design and development teams. Committed to staying updated with the latest trends, I believe in marrying aesthetics with functionality for seamless user experiences. I'm an avid learner and look forward to contributing my skills and creativity to your dynamic team's success.

HANDS ON EXPERIENCE IN PROJECTS

1) Project Title : Non-Emergency Medical Transportation services
Role : SQL , HTML, CSS developer.
OS : Windows, Linux & Mac.
TOTAL TEAM : 5
Duration : 5 Month

Project Description:

NEMT services help people get to pre-scheduled healthcare appointments, including doctor visits, rehab, clinical testing, follow-up exams, and more. The demand for safe and reliable public transportation for people with medical issues and disabilities, particularly in rural communities, continues to grow at remarkable rates. The demand for safe and reliable public transportation for people with medical issues and disabilities, particularly in rural communities, continues to grow at remarkable rates.

NMT services are available to all beneficiaries with full-scope Medical and to pregnant women, including to the end of the month in which the 365th day post-partum falls.

Medicaid non-emergency medical transportation (NEMT) benefit facilitates access to care for low income beneficiaries who otherwise may not have a reliable affordable means of getting to health care appointments.
